# Anuvis Mejia

Full Stacks Ruby Web Developer - But it's always more than that.

About Myself

I came across a word the other day Full stacks developer... interestingly enough its the knowledge of all things web and software oriented. So with the web becoming increasingly more difficult and software becoming more advanced by the day to think that this is what I aspire to be makes me believe that I'm a special individual.

Hi, my names Anuvis Mejia and I'm beginning to think this is the right line of work for me.
